

Winch 2 speed COMPACT

Size 28, power of a 45

3 in 1

PONTOS
THE WIND OF CHANGE

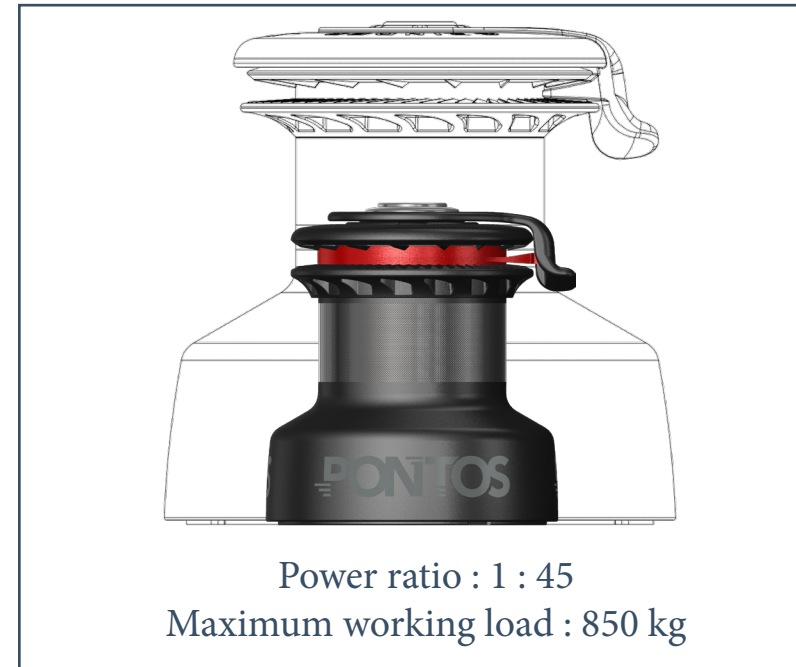

NEW
PRODUCT

A 2 speed self-tailing winch packed with innovation. Pontos has adapted the technology of their 4 speed winch and created the smallest powerful winch.

Benefit from a stunning line recovery in first gear (twice the speed of a conventional winch) and then move into 2nd gear and feel the power of a size 45 winch.

The combination of a small footprint, the power of a 45, and a working load of 850Kg. makes the Compact a highly versatile winch. Self-tailing will take lines from 8 to 12 mm. It can easily replace any winch up to and including size 40 bringing both added performance and increased comfort.
